

# Automation and Control Products

## Linesheet for Industrial Instrumentation

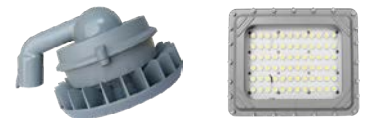

- signal conditioning with Modbus connectivity
- intrinsically safe options, Bluetooth accessible
- universal and temperature transmitters, isolators
- smart safety converters, frequency converters
- digital displays (LED, LCD), easy programming

- all-in-one HMI/PLC with built-in I/O, networking
- remote monitoring and WebMI
- Free HMI/logic configuration software (Cscope)
- local and remote I/O, EthernetIP, AB protocol, etc.
- UL Class1, Div2 options
- compatible with SAE J1939

- industrial lighting: HazLoc, task lights, linears, UV, inspection, grow lights, and lighting controls

- wireless monitoring via transmitters for any sensor
- long range (up to 7 miles) even in obstructed areas
- data logging, integration to DCS, PLC, SCADA, etc.
- no monthly fees or subscriptions required

- turnkey solutions for lightning and surge
- signal, data, AC, telecom., power protection
- external lightning protection for facilities
- lightning studies and assistance available
- grounding, cables, lightning rods, etc.

- thermal mass low flow meters and controllers
- Coriolis low flow meters/controllers (<1 gram/hr)
- custom manifolds for flow and pressure
- all-in-one compact flow, temp, pressure controllers
- vapor generation systems

- industrial pressure transducers with MEMS tech.
- pressure ranges from 0-45,000 PSI
- single piece metal; no welds, cavities, or o-rings
- pressure spike tolerant
- wide range of wetted materials

# Automation and Control Products

## Linesheet for Industrial Instrumentation

**KROHNE**

- magmeters, VA meters (rotameters), and more for municipal / wastewater
- KROHNE authorized service center
- battery magmeters; meters for partially filled pipes
- level transmitters and switches

- water level sensors and data loggers
- ±0.05% full scale accuracy
- conductivity, temperature, and depth in one unit
- built-in lightning protection and 5 year warranty

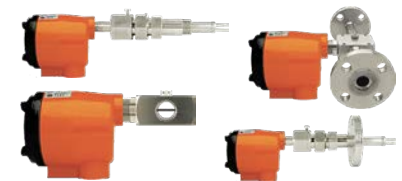

- valve position sensors, downhole well monitoring
- GE and Westinghouse replacement LVDTs
- submersible CAN BUS communication
- industrial gauging, process control, HazLoc options

- level transmitters, switches, and floats
- guided microwave, ultrasonic, capacitive, magnetostrictive, and more
- water quality monitoring: ORP, pH, dissolved O2

- thermal dispersion flow switches and meters
- level switches, interface sensing
- easy, user-friendly setup, rugged design
- integral and remote style electronics enclosures
- approved for installation in hazardous areas

- combustion and emissions monitoring; CEMs
- ECOM authorized service center for calibrations and repairs
- spare parts and rental units on-hand

- vapor generation systems; liquid dosing systems
- gas cylinder monitoring and tracking systems
- breathable oxygen deficiency monitor
- programming, design, and engineering assistance
- training, troubleshooting, and technical support
