

OxyPro

Oxygen Deficiency Monitor

Leading the way in non-depleting paramagnetic oxygen monitors.

Industry Leading Safety and Reliability

The OxyPro leads in paramagnetic oxygen deficiency monitoring, providing unmatched convenience, safety, and accuracy.

Next Generation Technology

With a paramagnetic oxygen sensor, fuel cell replacement and frequent calibrations are a thing of the past.

- ✓ no sensor replacement
- ✓ industry-leading accuracy
- ✓ no frequent calibration requirements (up to 6 months)

Easy, Reliable Operation

Its low maintenance design and preset alarms provides plug-and-play operation for reliable, continuous monitoring.

- ✓ on-screen alarms
- ✓ no reference gas needed
- ✓ low lifetime cost of ownership

Customizable Design

Our ISO-certified workshop will assemble your OxyPro to your specification to fit the needs of any application.

- ✓ single or multi-sensor
- ✓ remote sensor options
- ✓ integration to DCS, PLC, or automation systems available

Rest assured that your team is protected by the most advanced and reliable oxygen monitoring system available.
