

Submersible Level Transmitters

High Accuracy Transmitters by Process Solutions Corp.

Keller submersible level transmitters

Keller level transmitters provide an infinite combination of level ranges, output options, and cable lengths, which ensures the perfect fit for monitoring equipment. They are frequently paired with a SCADA, PLC, or compatible display/control system for use as a water level indicator or controller.

Why choose our transmitters?

KELLER submersible level transmitters offer high accuracy down to 900 feet with built in lifetime lightning protection and standard three day shipping. Known for their superior reliability, reasonable cost, and ready availability, Keller submersible level transmitters feature small size and integral signal conditioning; simplifying installation anywhere quality liquid level sensors are needed.

What is included in our package?

- Standard 3 Day Lead Time
- Lifetime Lightning Protection Included
- Free Shipping on First Order
- SCADA Ready
- Custom Cable Lengths
- Spare Parts
- No Minimum Order Quantity
