

# Vibration Monitoring System

**Vibration monitoring has become an essential way of protecting critical equipment and avoiding costly downtime!**

With the new Process Solutions Corp. **PSC6019**, we provide vibration monitoring on a crisp all-in-one controller screen.

- The **PSC6019** allows you to:

- Easily monitor and record data
- Provides graphical trending data
- Transmits the data wirelessly or through hardwire

## The **PSC6019 Advantage**

The Horner XL7 has Ethernet, CAN and Integrated I/O. The PLC XL7 is designed around a high-resolution, wide aspect ratio color touchscreen. The display allows the controller to be used in a variety of ambient lighting conditions with 1000 nits of LED backlighting.

# Vibration Monitoring System

Fiberglass, Painted Steel, Stainless Steel and Explosion Proof (XP) Enclosures are available in any size and configuration up to full size panels and shipped anywhere in the world. This allows the **PSC6019** to be used in various locations and in harsh environments.

The **PSC6019** is a complete packaged and in stock system that is perfect for Cooling Towers, Fans, Motors, Turbines, Compressors and Pump Vibration Monitoring. It's the easiest way to accurately monitor, display, and record vibrations. In addition, custom configurations with any channel count can be assembled to meet your exact needs at our facility.
