

Bronkhorst mini CORI-FLOW is a precise and compact Mass Flow Meter and Controller based on the Coriolis measuring principle. It can measure gases or liquids. The instrument is equipped in a robust IP65 weatherproof housing and is available with ATEX approval for use in Zone 2 hazardous areas.

Horner XL10 HMI features built in Digital & Analog I/O. The 640x480 high-resolution resistive touch screen has 32,000 colors and several languages to choose from.

Combining these two powerful devices in the PSC 6000_XL10 plugs you into **the best conversation as silent as Modbus.**

The Bronkhorst mini CORI-FLOW seamlessly communicates with the Horner XL10 via MOD BUS and displays the information on the screen. This way you can modify as many preprogrammed parameters without the need of cumbersome hardware or additional software downloads. This complete package offers:

- Flow rate
- Totalizer
- Set point
- Batch operations
- Easy access to connections

The PSC 6000_XL10 can extract data that the Bronkhorst mini CORI-FLOW processes and load it straight onto your Micro SD or USB. Now you can take your data with you!
